STAY IN TOUCH AROUND THE OFFICE

These days business people spend less and less time at their desks. Working life is all about cooperating with different teams and involves frequent changes of location. To manage it successfully, you need to be in full control of your communications.

A Jabra PRO™ 9400 series headset is an indispensable working tool which helps you do this and, at the same time, increases your productivity!

The new headset's unique touch screen base can transmit calls from any device - desk, soft and

mobile phones - and it consistently delivers high quality sound up to 150m from your desk. So you can move freely between your office and meeting rooms, using just one headset for all your calls. Meanwhile, your hands are always free to check files, type and make notes if necessary.

Jabra PRO 9400 series headsets are also UC ready, preparing you for a smooth transition to Unified Communications now and in the future.

SHARPEN YOUR SENSES

Jabra PRO™ 9400 series is the first office headset that combines DECT and Bluetooth® and integrates hearing, sight and touch to improve your communication. An exciting line-up of new features enhances the user-experience. Advanced

audio technology gives you crystal clear sound; DECT connectivity gives you up to 150 meter range with consistent sound quality; a flip up screen with touch interface puts call control at your finger tips.

HEAR ME.

SENSATIONAL SOUND QUALITY

Several state-of-the-art sound technologies enable the Jabra PRO 9400 series to deliver unrivalled call clarity and safety. A dual microphone Noise Blackout™ system with advanced Digital Signal Processing practically eliminates all background noise, so your voice can always be heard clearly. Wideband quality ensures that the sound you hear is sharp, while SafeTone technology protects your hearing.

SEE ME.

SEEING IS BELIEVING

Sight is one of our most influential senses. That's why we have equipped Jabra PRO 9400 series headsets with a 2.4" color display that sets new standards for usability. The screen helps you adjust headset settings and it provides you with a status on your calls. For example it can show callers' phone numbers – or if someone tries to reach you on your softphone while you are on a mobile or desk phone call.

STYLISH DESIGN AND ALL DAY COMFORT

Jabra PRO 9400 series headsets' stylish, discreet design is adaptable for different wearing styles that ensure a perfect fit all day long. As Unified Communications becomes the norm, users will be wearing their headsets for longer periods, making comfort more important than ever. Choose between a headband, neckband or try the unique Jabra earhook. All wearing styles allow for easy adjustment for use on the left or right ear.

TOUCH ME.

CONTROL ALL YOUR PHONES WITH ONE HEADSET

Built-in Multiuse technology means all your phone calls come to the same headset regardless of which number the caller uses – desk, soft or mobile phones.

The Jabra PRO™ 9400 touch screen base unites your three phones (mobile phone via Bluetooth®) and connects to your headset via DECT – a technology characterized by its reliable, long range capabilities. This extended range gives you the freedom to move up to 150 m away from your desk, without limiting your communication options.

TOUCH SCREEN AND TOUCH SENSORS

No matter which device your callers try to reach you on, you can always answer just by tapping the headset button. The touch sensors also allow you to adjust volume and mute calls.

A SmartSetup wizard on the touch screen guides you through the simple process of connecting phones and choosing preferences to get started. Once you're up and running, the screen's colourful icons and intuitive menu system make call-handling a breeze.
